

Calendarium Astrologicum

OR AN

A L M A N A C K

FOR

the Year of our Lord, 1668.

CONTAINING

The State of the Year, Eclipses of the
Luminaries, Full Sea, the Sign,
Terms, and their
Returnes;

With many other useful and delightful
Observations.

Unto which is added,

A Description of the most Eminent Roads in
England; from Town to Town, and the certain time
of any Mart or Fair, happening in any of them.

THOMAS TRIGGER, Genl.

Student in Physick and Astrologic.

—habent sua fata Libelli,

LONDON, Printed by A. Maxwell, for the
Company of Stationers, 1668.

Vulgar Notes Explained.

English Account.			Foreign Account.
	16	Golden Number	16
	25	Circle of the Sun	25
Ⓒ Ⓔ		Dominical Letter	Ⓐ Ⓔ
	1	Number of direction	4
	26	Epact.	16
January	19	Septuagesima	29 January
February	5	Dies Cinerum	15 February
March	22	Easter Day	1 April
April	25	Rogation Sunday	6 May
April	30	Ascension Day	10 May
May	10	V Whitesunday	20 May
November	29	Advent Sunday	2 December

Note. That the Roman, or Foreign Account, begins always ten days before the English Account; and the Eleventh day of the Month with them, is the First day of the Month with us; and the Last day of the Month with us, is the Tenth day of the Month with them.

Note also, That Easter falleth this year upon the 12 of March, in its lowest Limit, and the nearest boundary; and lower at any time it cannot fall: it hath not fallen so in many years before, nor will it so in many years again.

A very plain and easie Table to find the
true Interest due upon any Sum of Money,
from five shillings to an hundred pounds
for a year or under, after the rate
of six pounds in the
Hundred.

TRIGGE, 1668.

An Astrologo-Physical Discourse.

That the pre-dominion of humours, is the immediate cause of diseases; and that the excitation of those humours, is caus'd by the various and different Aspects and Positions of the Stars, is even by Hypocrates and Galen themselves confirmed. Trust we then to these Rules Astrological, to be observed for advantage of the sick:

Let the	{	Sanguine	}	bleed the D being in	{	♄, or ♀.
		Cholerick				♂, or ♄.
		Phlegmatick				♁, or ☿.
		Melancholy				♁, ☿, or ♄.

But let her be also in aspect of the Fortunate Planets, and seated in a fortunate part of Heaven.

It is good to purge with Eleſtuaries, when the D is in ♀; with Pills, when she is in ♄; with Potions, when in ♁, being then posited as before directed.

Vomits are unsafe for all sorts of complexions and constitutions; yet sometimes there is a necessity for them: As when the Distemper lyeth above the stomach; it being impossible for a Purge, or any purgative medicine, thence to carry it; but when there is an occasion, they may be safelyest taken when the D is in ♁, ♀, or ♄, in any good aspect of ♀, ♁, or ☉.

Clisters are most conveniently administred, when the D is in ♁, ☿, or ♀, posited as before.

Good to stop Fluxes, or Rheumes, or Issues, when the D is in any of the earthly Signs, viz. ♁, ♀, or ♁; of which Experience is a valuable witness.

Very proper to Bath, when the D is in ♀, ♁, ☿, or ♄, in aspect of ♁, or ♁.

Convenient to cut Hair, the D being in ♁, ♄, ☿, or ♄, increasing in light. And although this be, in the opinion of many, but a trivial thing to observe; yet were it more taken notice of by the Gallants of our times, they need not disguise themselves with Venus locks: But they, it may be, esteem it an honour, to be made amends with a part of her, that originally injured them.

Medicina à medico; medela ab Altissimo.

A

A Description of the four Seasons of the Year.

1. Of the Spring.

Æquinoctium vernale, or the Spring Quarter, hath us name *a virendo*, from flourishing: *Quia tunc omnia florent & virent.* (i. e.) Because at that time all things look fresh, and flourish. It beginneth alwayes when the Sun toucheth the first point of Aries, which this year happens to be on march the 9th. day, five hours, 26. minutes, p. m. or after noon; and continueth all that time the sun passeth through all, Aries, Taurus, and Gemini. It is a Quarter naturally hot and moist, and is therefore fitly resembled to youth, to the sanguine complexion, and unto the Element of the Aire.

The Diseases ordinarily appropriate unto it, are Fevers, small Pocks, Leprosies, Itch, Pluresies, Asthmas, troubles in the eyes, voluntary bleeding; with many other infirmities proceeding from a corrupted mass of blood.

The twenty fourth degree of the Cœlestial Virgin ascends on the Eastern Finitor: and Mercury, Lord thereof, is in conjunction of the Sun in Aries, descending in the Occidental Angle, in Sexrile of Saturn in the fifth, making Youth and young People more grave, prudent, wary, and serious, than at other times: It is a position that seemes to blow away the bubbles of youth, and propends them to the understanding of things weighty and worthy; scatters the sailes of vanity and inconstancy, and leaves them good store of Ballast in the room thereof: it ripens their judgments, opens their intelligence, and makes them apt to learn any thing with ease and pleasure.

TRIGGE, 1668.

Other significations it hath, but I shall pass them here, they being of less Emolument than those remembred, and so I shall come to the second Quarter of the Year, which is called ———

2. The Summer Season.

Solstitium Aestivum, or the Summer Quarter, begins where the Spring ended; and consisteth of that portion of time, in which the Sun's running through the Celestial signes, Cancer, Leo, and Virgo: and this Year commenceth on the tenth day of June, eight hours, thirteene minutes Post meridlem; or afternoon.

The Summer taketh its Name of Aestu, because of the very great heat this season alwayes affordeth: or else it may be termed Summer, Quasi Sühne mehu; according to the Germans; for, then we have plus solis, more of the Sun, than at any other time of the year.

It is a season, naturally hot and dry; and is assimilated to fire, choler, and unto min-hor. The Diseases that at this time chiefly reign, are ——— Imposthumes, Pestilent Fevers, Jaundies, Burning Agues, Madnes, Inflammations, with all other weakneses proceeding from choler. The cholerick Person is now most unhealthy; and the flegmatick enjoys most health at this time: because the powerful heat of the season, dries up the superfluous moisture that used to discompose him.

The Arabians are of opinion, that this ought to be the first Quarter of the Year, they opinioning, and believing, that the Sun was created in Leo, and they fortifie this their opinion with this reason, because all Astrologers have ever held that the celestial Lion, was the greatest dignitie, and mansion House of the Sun. Mercator in his Chronologie is of the same opinion, and fancy also; and so are many other very learned and famous men: But they must pardon me, if I tell them, I cannot con-

ceive,

TRIGGE, 1668.

ceive, (nor I think themselves prove) how they, or any other should come to know, when, or in what sign the Sun was created?

3. Of Autumne.

AEquinoctium Autumnale, or the Autumnal Quarter, commenceth when the Sun entereth the first scruple of the celestial ballance, or the sign Libra: and it continues all that time the Sun passeth thorow these three signes, Libra, Scorpio, and Sagitary: and this year falls out to be on the twelfth day of September, twenty two minutes past eleven of the clock, before Noon.

Some of the learned among the Jewes, esteemed this Quarter the first Quarter of the year; and they give this Reason of their Opinion, Quia tempus est fructuosum; because it is a time of fruit; according to that known saying in the Holy Scripture, — Et protulit terra herbam virentem, facientem fructum juxta genus suum: And the Earth brought forth the green Herb yielding fruit after, or according to its kind.

This is a season cold and drie, and is aptly resembled to melancholy, to the Element of Earth, and to the declining age of man.

Diseases incident to men this Quarter, are principally, pains in the back; darknes of sight, a retention of Urine; also the Canker, Hemeroides, Fistulaes, &c. With all other Infirmities proceeding from that destructive humour of melancholy. And thus much for this Autumnal Quarter.

4. Of the Winter.

SOLSTITIUM Hyemale, or the Winter Quarter beginneth
 alwayes when the Sun toucheth the first minute of Ca-
 pricorn, and continueth all the time he is transiting
 through these three signes, Capricorn, Aquarius, Pis-
 ces: And this year happens on the tenth day of De-
 cember, at seven minutes past eleven of the clock at
 Night.

Now, although this Quarter be vulgarly called and re-
 puted the last, yet it ought rationally to be accounted as
 the first Quarter of the Year: And it was so by Nu-
 ma Pompilius, and for this eminent Reason——
Quia tunc Sol ad nos ascendere incipit, because then
 the Sun begins to ascend in the Ecliptique, and come neerer
 unto us: Whence Ovid——

*Bruma novi prima est veterisq; novissima solis;
 Principium capium Phœbus & Annus idem.*

And Doctor Childrey in his ingenious (though short)
 Discourse, Intituled *Indago Astrologica*, learnedly
 urgeth——That the Year ought to begin at this quar-
 ter or Solstice: For (saith he) though Aries be the
 birth of Vegetables, yet Capricorn is the conception of
 them.

This Hyemal Quarter, is cold and moist, (Rain be-
 ing more frequent now, than at other times,) and it is
 properly assimilated or resembled to Water, to Pblegme,
 and to old Age.

TRIGGE, 1668.

The Diseases commonly incident to this season, are, the Tooth-ach, scabs, Fluxes of the blood by the inferiour parts, Pushe in the face, Defluxions and Rhumes, Palsies, Gouts, and all other Diseases proceeding from stigm.

It may be expected, that I should have been larger in my Astrological Judgements, but that is done in each particular Month of the fore-going Calendar, unto which I referre the Readers. And thus much shall serve here for Quarterly Ingresses.

Of the Eclipses this Year, 1668.

Four Eclipses will happen this year, viz. two of the Sun, and as many of the Moon: But in our Hemisphere only the first of the moon, and last of the sun, will be visible. Yet I shall make mention of them all, as they shall in order appear unto the Inhabitants of this habitable Globe.

The first will be a great Eclipse of the sun, on the xxv. day of April, near unto our midnight, and therefore impossible to be seen of us; but it will be conspicuous unto such people, that inhabit the remotest southern parts of the Earth. It is celebrated in 21. degrees of Taurus, near unto Caput medusæ, secundum Longitudinem. It points out much sorrow and trouble unto all parts of the World, and persons in it also, that have that part of Taurus, either their Horoscope, or place of their sun and moon, in their Nativities. Among the rest, I pray God to bless the plentiful Country of Ireland, from penury, or anything like a Famine; as also, from all other troubles, whether intestine, or with, or from forraign power.

The second Eclipse will be of the moon, and will fall out on the 16th. day of May, being Saturday, near four a clock, in the morning: It will be an almost total Eclipse,

TRIGGE, 1668.

there being no less than ten parts of twelve, of the moons whole body obscured. It happens in six degrees of Sagittary, near the Scorpions heart; it hath remarkable portents, and paints out the death of some eminent famous female person: whether Empress, Queen, or Dutchess, I say not, nor take upon me, to determine. Yet this I may, Sagittary is an Easterly sign, and the last of the fiery Trigon, which rules over the East part of the World: Ergo, the dangers this Eclipse principally portends, will happen Eastward.

The third will be an Eclipse of the Sun, on the 25th. of October, about One of the clock in the Afternoon, and happens in the 13th. degree of Scorpio, and in the Ninth House of the Heaven; some great Churchman, either beyond the seas, or among us, yields unto the Grave; where many unhappinesse emerge in Ecclesiastical affairs; yet the best of it is, they will suddenly be over again, and all matters admit of a celerous settlement. It also prenotes in the North-East part of the World, many Battells, Tumults, Injuries, and much Violence: terrible Thunders and Lightning, doing much harm, Fires, wasting of Towns and Cities, &c. The last Eclipse, which falls out this Year, will be a very great Eclipse of the Moon, on the eighth day of November, in the Afternoon: It happens in 27. degrees of Taurus, almost in conjunction with the Vergilia, or seven Stars. It will be visible to all the Oriental parts of the World, viz. unto China, Tartary, and in the Indies, both within and without the River Ganges, and many other places, as may be seen upon the Terrestrial Globe.

This Eclipse brings on the effects of the first of the Sun, which happens on April 30. and remarkably heightens the 2nd: It happens within six degrees of the same place with the ———. It bids all persons, that have the Sun, Moon, mid-Heaven, or Ascendant, in the last decanate of Taurus,

Taurus, to be very wary and circumspect in all their affairs, of all kinds; and to be mindful of their healths; to avoid ill company, and all ruminary Assemblies; and then (by Gods blessing) they may avoid much of the evil these Celestial Monitors presage to them. And thus much for Eclipses this Year:

For Conclusion, I shall add one word or two in defence of Astrology. Many men have been pleased to asperse Astrology, and to proclaim it incapable of giving notice to the World of general Accidents: And a Learned person hath lately printed it against Astrologers: That in such kind of Accidents (as the late Plague, and Fire were) they are usually silent.

Had this Learned Gentleman been as willing to have read the Writings of Astrologers, as forward to blast their fame and skill, he would (I conceive) have had no ground for so great an Irony, and unjust a Satyr, against them. It is not their, but his error, that he readeth not their Writings. Nor can they deal more fairly for his, or the Worlds satisfaction, in such matters, than they do, in publishing their Prognostications, wherein they do predict such things to fall out, and happen unto the World, as farr as their acquaintance with the Stars will permit them; and that sometimes too plainly, as it hath of late years been (by lamentable experience) verified: Although I cannot say, they are able to predict, who shall, and who shall not read them? Nor yet, who shall be evil to, and who shall be censorious of them. And that I may acquit Astrologers, in this behalf, (as a Learned Doctor, some three years since in another, viz. about Easter, being pretended to be mis-
 rmed by the Almanack-makers of this Nation generally; as if they, by a general consent, had designed to delude the World.) I shall desire my Readers to remember, That in my *Calendarium Astrologicum*, for 1664. (in the Winter of which Year the Plague began; as may be seen, by a
 Treatise

TRI G G E, 1668.

Treatise, entituled, Londons Deliverance predicted, &c.) I foretold the Plague exactly, in these words, — Church-yards thrive, and grow fat; Parishes begin to be less peopled; more dye, than are married. — And in my *Calendarium Astrologicum*, for the Year 1666. I predicted (sorry I am, I saw cause to do it,) the Firing of London, in these words, — God grant that London in England, in the stead of Rome in Italy, be not the place shall suffer the ruine and perdition threatened. I spare to speak of many hundreds more, because I abhor to blow the Trumpet too loudly in my own praise. Say now, Antagonists, are Astrologers in such matters silent? Or, are they not unhappy rather, in not being read by such as causelessly censure them?

FINIS.

Books lately Printed.

Vox Solis: A Discourse of the great Eclipse of the Sun, in June, 1666. by J. G. and sold by E. Calvert.

Mathematical Collections and Translations, in two parts, from the Original Copies of Galileus, and other famous modern Authors, by Thomas Salisbury Esq;

The Art of Numbring by speaking ---- Rods vulgarly termed Nepeirs bones.

Gunter's Line made easie: And the use of the Line of Proportion improved, by William Leybourn. All three to be sold by George Sambridge on Clerkenwell-Green.
